DETAILED ACTION

Applicants' arguments, filed March 24, 2008, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

As noted by Applicant on page 6 of the response filed March 24, 2008, claims 40-50 are withdrawn as being direct toward a non-elected invention (a method of treatment).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Desjonqueres (US Patent 5254585).

Desjonqueres teaches a composition comprising peroxidized safflower oil (obtained by peroxidizing safflower oil) with a degree of peroxidation of 149 meq/kg and colloidal silica at a concentration of 1.6% by weight relative to the weight of the total composition, including the capsule (Example 1, columns 3 and 4). Desjonqueres further teaches the use of peroxidized lipids of the formula of claim 9 (column 2, lines 39-50) in said composition. Desjonqueres does not explicitly teach that the composition is

Art Unit: 1614

compatible with use as a spray, the viscosity of the composition at 20°C, or the density of the composition; however these limitations are physical properties of the composition mentioned above and therefore are necessarily present in said composition.

It is noted that *In re Best* (195 USPQ 430) and *In re Fitzgerald* (205 USPQ 594) discuss the support of rejections wherein the prior art discloses subject matter which there is reason to believe inherently includes functions that are newly cited or is identical to a product instantly claimed. In such a situation the burden is shifted to the applicants to "prove that subject matter shown to be in the prior art does not possess characteristic relied on" (205 USPQ 594, second column, first full paragraph).

Applicant argues that the composition of Desjonqueres comprises greater than 4% silica and therefore does not read on the instant claims. This is found unpersuasive because it is reasonable to include the capsule as part of the composition and as noted above the silica is at a concentration of 1.6% by weight relative to the weight of the total composition, including the capsule and thus satisfies the limitations of the instant claims. Applicant further argues that the composition of Desjonqueres is not suitable for buccal administration or compatible with use as a spray. This is an allegation without factual support and is therefore unpersuasive. Applicant has provided no evidence as to why the composition of Desjonqueres is not suitable for buccal administration or compatible with use as a spray and as noted above the composition of Desjonqueres meets the structural limitations of the instant claims and these properties are believed to be necessarily present. Additionally the content of FR 2705568 is moot because the instant rejection is based on Desjonqueres (US Patent 5254585).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
